AI IS THE NEW FIREWALL

THE $136B CYBER REVOLUTION

From autonomous threat detection
to AI vs AI cyber warfare

$136B
by 2032

**AI Cybersecurity Market
Growing at 25% CAGR**

From $28B in 2025 → 5x in 7 years

AI-Powered Threats Explode

⚠️ $12.5B Lost to Cybercrime in 2024

FBI reports 10% YoY rise in complaints. Ransomware incidents doubled in 2 years. AI automates attacks at unprecedented scale.

🤖 AI-as-a-Service for Attackers

Deepfake social engineering, automated vulnerability discovery, and adaptive malware now available to less-skilled actors.

⏱️ Exfiltration Faster Than Response

Mean time to remediation shrinking. AI attackers operate 24/7. Human defenders can't keep pace alone.

AI-Powered Defense

Real-Time Threat Detection

ML analyzes terabytes of data instantly. Behavioral anomaly detection catches zero-days that signatures miss. 74% faster detection.

Autonomous Incident Response

AI agents triage alerts, contain threats, and initiate remediation without human intervention. Response in milliseconds.

Predictive Vulnerability Management

AI prioritizes patches based on actual risk. Predicts attack paths before they're exploited. 67% better predictions.

Enterprise AI Security

BFSI Leads with 28% Market Share

Banking and finance face strictest compliance mandates. High-value data = high-value target. AI is now mandatory.

70% Cloud-Based by 2025

Cloud-native AI security scales instantly. SaaS delivery lowers barriers for SMBs. Insurance now mandates AI detection.

Asia-Pacific: Fastest Growth at 33% CAGR

17.7B IoT endpoints globally. 78% of utilities report rising cyber-physical threats. Zero-trust mandated by NIS2.

"

The only way to fight AI is with AI. Adversaries can scale up attacks at unprecedented rates, overwhelming human defenders.

— **Palo Alto Networks Cybersecurity Report**

Key Insight: The talent gap is real — 44% of executives cite cybersecurity skill shortages. AI doesn't just augment teams; it lets them operate with 53% fewer errors and handle 10x the alert volume.

Is your organization using AI for cybersecurity yet?

🛡 Or still relying on signature-based tools?

Infinity
AI PLATFORM

Israeli security pioneer (invented the firewall). Infinity architecture unifies prevention across network, cloud, mobile, and endpoint.

🔥 **Infinity AI Copilot:** Launched Jan 2024. GenAI resolves global cybersecurity talent shortage. Automates SOC operations with intelligent recommendations.

The AI Security Playbook

AI vs AI Arms Race

Attackers and defenders both deploying AI. Speed and adaptability determine winners. Human-only defense is no longer viable.

Platform Consolidation

Too many tools = too many gaps. Leaders like Palo Alto acquiring aggressively. Single pane of glass + unified AI = better defense.

Zero Trust + AI = New Standard

NIS2, NIST frameworks mandate ML-aware defenses. Behavioral analytics and continuous authentication everywhere.
